Hello,

We are the legislative committee of the International Milk Haulers Association. We are in the process of seeking forms of tax relief from our federal government.

We have already been in contact with several members of Congress. They have given us direction on what they need from the milk haulers to get this started. We will also be hiring a full time lobbyist to work at the Federal level and help fight for the milk hauler on a daily basis.

This will take time, money, and hard work to accomplish. We, as a committee, are committed to put in the time to fight for tax relief that members of the farming community and trucking industry receive and milk haulers don't.

We need your help. Please fill out the survey and return it to Mary Leibham, our committee member, who will be handling and processing the information. This survey will remain confidential and anonymous.

Let us take a step in the right direction for tax relief and fill out the survey.

Thank you,

International Milk Haulers Association
Legislative Committee
